

Programs and installation

The archive BACAMAR2.ZIP contains the folder BACAMAR2. In this folder there are:

This file (ReadAboutProgramsVol.2.PDF)

The file BACAMAR2 which is an HP49G directory that contains all programs of the marathon. If you transfer this file to your HP49G, then use XMODEM. A new directory will be created on the HP49G, with the name BACAMAR2, in which you will find the programs.

The file BACAMAR2.PDF which is the Basic Calculus Marathon Volume 2 - Part 4.

The folder PROGRAMS_TXT which contains all programs of second volume of the marathon as text files. You can transfer them to the HP49G using Kermit, but they are thought for editing rather, than for transferring. If you would like to change some program, then you can do that on your Mac/PC using your favourite text editor and a real keyboard, and then transfer the program to your HP49G.
