

Circuits of two doors

Platform: HP49G

Size: 7892 bytes

Version: 1.0

Circuits of two ports for calculators hp49g which solves circuit T and circuit Pi finds the results and it shows you the characteristics of the development, I would advise you to copy just ace this the answer for not losing cheats in an exam and undoubtedly you have to have much care when putting the it dates there is to make it just ace you it indicates it to you, the results that he/she voted you the calculator it will be the main **Z** and its determinant
, the womb **Y** and their determinant, and **H** also voted you and **A**

He/she notices important: this version of the program worked well with ROM 1.19-6 and 1.18 I don't become responsible if one makes uses in smaller versions at 1.18 since they were only you come in the suitable versions
