

Program Version	Creation Date	Program Author	Country	Calculator	ROM Version
1.00	01/20/2001	Miguel Angel CAPORALINI HERK			1.18
Program Title					
<b>Electric Power Calculus for Aternating and Direct Current</b>					
Library Number			Checksum (CRC)	Bytes	
<b>L902.lib – ELEPO</b>			<b># BBCBh</b>	<b>13,787.00</b>	

I writing 38 programs in UsrRPL Language and after create a Library (L902.lib - ELEPO), wich allow calculate ... for a Electric Power Equipments, (used in Oil & Gas and Other Industries):

Amperes ( if HP is Known )  
Amperes ( if KW is Known )  
Amperes ( if KVA is Known )  
Horsepower ( Output )  
Kilowatts  
KVA  
Motor Full Load Torque  
Motor Kilowatts  
Motor KVA  
Power Factor  
Reactive KVA  
Synchronous Speed ( R.P.M. )

For Efficiency (%) = Consult to O.E.M. ( Original Equipment Manufacturer ).
