

FLOOD IT for the HP PRIME

By Tony Gallo (tgallo@tbaytel.net)

Rules:

The object of the game is to flood the whole board with one color in 25 steps or less. You start from the top left corner and progress by selecting one of the colored circles on the left. When you change your current area color, every adjacent square with the same color also changes, that way you can flood other areas on the board.

Navigation:

To choose a color you can either touch it or use the rocker wheel to highlight the color you wish and press ENTER.
