

中文拼音输入法

版本 1.1

适用于 HP Prime

这是一个中文输入法。使用键盘输入拼音，然后通过触摸屏点击汉字进行输入。

按[SHIFT]键切换数字/拼音输入，按[ALPHA]键切换大写英文/小写英文/拼音输入。[Up][Down]切换多页候选字。

按[-]预览文本，按[ENTER]输出。默认设置为[ALPHA]+[Dot]快捷键，可自行更改。

[Apps][Esc][Home][CAS]分别对应“，”、“。”、“？”和“！”（英文模式下对应“,”、“.”、“?”和“!”）。也可在拼音模式下输入 v 获取更多中文符号，ve 获取更多英文符号。

注意：

目前仅支持一次只能输入一个字的拼音，且必须输入完整音节，否则无法显示候选字。删除文本需先按[Del]清除拼音输入框，此时再按[Del]可删除文本。

Chinese Pinyin Input Method

Version 1.1

For HP Prime

This is a Chinese input method. Type pinyin using the keyboard, then select Chinese characters by tapping on the touchscreen for input.

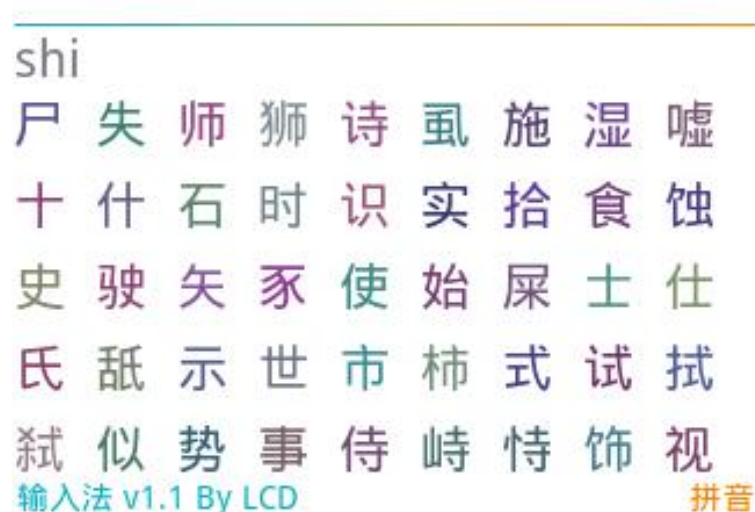

Press the [SHIFT] key to switch between numeric/pinyin input. Press the [ALPHA] key to switch between uppercase English, lowercase English, and pinyin input. Use [Up] and [Down] to navigate multi-page candidate characters.

Press [-] to preview the text, and [ENTER] to output it. The default shortcut is [ALPHA]+[Dot], which can be modified as needed.

Apps][Esc][Home][CAS] correspond to ", " ". " "? " and "!" respectively (in English mode, they correspond to ", " ". " "?" and "!"). Additionally, in Pinyin mode, you can input 'v' to access more Chinese symbols and 've' to access more English symbols.

Note:

Currently, only single-character pinyin input is supported, and the entire syllable must be entered; otherwise, candidate characters will not be displayed. To delete text, first press [Del] to clear the pinyin input box, then pressing [Del] again will delete the text.
